BUZZI
METALLURGICA

Protagonist of the market for home and garden items

Founded sixty years ago in the heart of Brianza in the Lecco area, which has always been one of the industrial districts traditionally devoted to metallurgical activities, Metallurgica Buzzi is an excellence in the network of small and medium-sized enterprises that builds the lively and dynamic economic-productive system in Lombardy.

Metallurgica Buzzi has grown over the decades, always remaining faithful to the values of its origins: passion combined with the pursuit of quality, product innovation with production flexibility, the typical "made in Italy" design with attention to details. Not to forget the strong focus on customer satisfaction.

The choice to specialize, from the earliest years, in the design and manufacture of items for home and garden, coming from the expertise in working the iron wire, led the company to gradually acquire not only a reference position in the Italian market but also an important role on international markets.

Today Metallurgica Buzzi has two production plants: a covered area of 1,800 square meters on a total surface of 10,000 square meters, for the whole processing stages of iron wire and flat steel bars, including painting and plastic coating; a shelved warehouse of 800 square meters to stock finished products, guarantees a constant and timely supply to customers.

Sixty years of passion and creativity

Transforming iron wire into objects capable of furnishing home and garden has always been the engine that pushed Metallurgica Buzzi to combine passion, creativity and Italian taste with a consolidated and original technical know-how. A sixty-year path, from 1960 to today, involving two family generations of businessmen.

Founded as a small artisan workshop specializing in the processing of iron wire for third parties, in the early 1970s Metallurgica Buzzi acquired a warehouse to place some spot-welding machines and started its own production of drying racks and flower-pot holders for balconies. The first market was in household wholesalers and hardware stores.

In the same years, with the participation at Macef and Miflor, the international reference fairs for home decoration and gardening, Metallurgica Buzzi made its debut into large-scale distribution, which would become its target market. Prestigious brands among department store chains such as Upim, Città Mercato, Cash & Carry and La Rinascente became quite soon regular customers of Metallurgica Buzzi, which in the meantime expanded its product offer by introducing a new finishing: the external plastic coating of the iron wire.

The following decade begins with the purchase of a new and modern warehouse, equipped with all the cutting-edge production technologies and with the acquisition of an oven for plastic coating, to cope with the increasing market demands. New important brands of large-scale distribution are captivated by Metallurgica Buzzi's products, starting with La Standa, followed by Esselunga and Bennet, MD, Coop together with other supply chains such as Obi and Brico io, Bricofer, etc…

The need to be able to guarantee stock availability in order to meet customer requests promptly and efficiently, led Metallurgica Buzzi to purchase a new warehouse to be used as a shelved stock to house the increasingly wide range of products manufactured, which today covers 260 codes. At the same time, the participation to international trade fairs abroad, such as SPOGA GAFA in Germany, further expanded the distribution horizons.

IDEAS   QUALITY   SERVICE

Leader in Italy, projected beyond borders

The constant ability to innovate its product, introducing new references every year, and to guarantee an range based on quality and design are two of the competitive factors that have allowed Metallurgica Buzzi to grow over the decades and to face with success all the market phases, even the most difficult, marked by the emergence of a strong competition on price coming from the Far East.

Flexibility, production capacity and attention to customer needs, are the assets for a permanent presence and reference position of Metallurgica Buzzi in its specific market.

Over the years, the company has built its leadership in Italy, as evidenced by the supply contracts with numerous brands in the large-scale and specialised distribution.

But Metallurgica Buzzi has also turned its attention beyond the borders of our country, thanks to a product renowned for its quality and its Italian taste. Currently, the export share of its turnover is 25%, with the aim of increasing, and is developed through a distribution network covering Switzerland, Czech Republic, Spain, United Kingdom, France, Greece, Belgium, Germany, Portugal, Malta and from 2020 the United States.

A production and logistics organization at the service of the large-scale distribution.

With a production capacity of approximately 5,000 flower-box holders per day, Metallurgica Buzzi has organized its production cycle in a rational and efficient way.
The automation of processes is one of the strengths of the company: thanks to its technical skills, Metallurgica Buzzi has never limited itself to the purchase of ready-made machineries for the processing of the wire and its welding, it has always proposed interventions for the customization to increase productivity without sacrificing quality.
The experience of the staff employed, highly loyal to the company, guarantees an added value in terms of attention to details that customers can benefit from.
The decision to invest in the purchase of a warehouse dedicated exclusively to the stock of finished products is once again a decision taken to offer a complete service to its customers. In the 800 square meters of shelf-storage, all the references of the wide catalogue of products proposed by Metallurgica Buzzi are constantly available, perfectly packaged, in order to guarantee fast and reliable deliveries.

Flexibility and quality:
our competitive factors

High production flexibility and constant pursuit of product quality are two strengths of Metallurgica Buzzi's presence on the market, essential for offering tailor-made answers to the demands of large-scale distribution. The extreme versatility of its plants and their production capacity, together with a strong customer orientation, is the base for a prompt and quickly reaction to the demand of the major brands for which the company works. The large warehouse also represents a strategic stock to cope with unscheduled requests. The quality of the products is achieved through a complete control of all the different production phases and process: from the purchase of the raw material (steel, epoxy powder for painting, polyethylene powder for plastic coating) from leading Italian producers who certify their origin to the numerous controls throughout the production cycle, up to the final packaging and storage. Metallurgica Buzzi guarantees attention to the critical aspects of the process, from bending and welding to finishing and packing.

Attention to the environment:
a concrete commitment.

The production process of Metallurgica Buzzi fully complies with the strict regulations in force on health and safety in the workplace and with particular attention to respect for the environment.

Raw materials used in the production are entirely recyclable. The production plants are equipped with all the requirements imposed by law; in particular, the use of a powder coating system avoids the use of solvents and reduces waste. The dust dispersed during the application phase is recovered inside the cabin and no pollutant substances are released into the atmosphere.

The attention of the company to the environment is also evident in the packaging of the goods: a specific packaging is designed to optimize space during transport.

Visual merchandising:
tools and supports for sale

The experience gained in over forty years of cooperation with the most important brands in the large-scale distribution has led Metallurgica Buzzi to select its packaging taking into account the specific needs of product presentation at the points of sale.

For this reason, each item offered includes a careful study of the packaging, with the aim of providing the end user with all the information necessary for an independent purchase. This simplifies the sell-out of the store and helps to offer effective visual merchandising solutions: optimizing the space in the store to improve the attractiveness of the product.

2000 LINE

A modern and elegant design for a line of products whose features are strength and functionality. Treatments and tooling assure high resistance to weather and long lasting bright colours.

All the features of the fix design with the addition of adjustable hooks for top adaptability and steadiness on every support.
